PROFESSIONAL SUMMARY

Data Analyst & AI Engineer with an analytical engineering background in B.Tech AI & Data Science. Strong foundation in Python, SQL, Power BI, Advanced Excel, and Machine Learning architectures. Experienced in data preprocessing, exploratory data analysis (EDA), and building NLP/Computer Vision models to extract insights and deliver automation solutions.

TECHNICAL SKILLS

- **Programming & Databases:** Python (Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow), SQL (MySQL/PostgreSQL)
- **Data Visualization:** Power BI, MS Excel, Matplotlib, Seaborn
- **Core Domains:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Natural Language Processing (NLP), Computer Vision

PROFESSIONAL EXPERIENCE

- **Python with Data Science Intern | TVK Technologies | Jan 2026 – Mar 2026**
 - Engineered and optimized Machine Learning models using Python for image classification and facial expression recognition.
 - Conducted structured data preprocessing, automated feature extraction pipelines, and model evaluation utilizing Pandas, NumPy, and Scikit-learn.
 - Performed deep Exploratory Data Analysis (EDA) on raw datasets to track trends, identify correlations, and improve final model training accuracy.
 - Generated analytical insight dashboards to translate raw structural data patterns into business and technical reports.

KEY PROJECTS

Sequential Emotion Recognition in Social Media | Python, Transformers, PyTorch, BERT

- Developed an advanced NLP system to detect, classify, and track sequential emotion transitions in social media conversations.
- Utilized state-of-the-art Transformer architectures (BERT/RoBERTa) for textual semantic extraction, achieving optimized model performance and high accuracy metrics.
- Fine-tuned deep learning models, handling sequence padding, text tokenization, and multi-class classification challenges.

Exploratory Data Analysis & Delinquency Risk Assessment | Python, SQL, Power BI

- Executed end-to-end EDA pipelines on delinquency risk datasets to isolate critical financial and operational risk indicators.
- Designed and deployed dynamic, interactive dashboards using Power BI, Matplotlib, and Seaborn to communicate complex business insights to non-technical stakeholders.

CERTIFICATIONS

- **AWS Technical Essentials** – Simplilearn SkillUp
- **Data Analytics Job Simulation** – Deloitte
- **Machine Learning with Python** – Coursera
- **Python for Data Science** – IBM (via Coursera)
- **Data Visualization with Power BI** – Microsoft Learn

Education

B-Tech Artificial Intelligence & Data Science | Tagore Institute of Engineering and Technology
Graduation Year: 2026 | CGPA: 7.8 / 10

LANGUAGES:

Tamil (Native), English (Conversational)
