Summary

Data Analyst with a strong foundation in **SQL, Python, Excel, and Power BI**. Skilled in data cleaning, exploratory data analysis, and data visualization to transform raw data into meaningful insights. Passionate about leveraging data-driven solutions to support business decisions and improve operational efficiency. Actively building real-world analytics projects..

Skills

Programming & Querying: Python, SQL

Data Visualization Tools: Power BI, Tableau, Advanced MS Excel

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

Data Analysis & Machine Learning Projects

Academic / Self Projects | 2025 – Present

- Developed machine learning models using **Python** for image classification and facial expression recognition.
- Performed **data preprocessing, feature extraction, and model training** using libraries such as **Pandas, NumPy, and Scikit-learn**.
- Conducted **Exploratory Data Analysis (EDA)** to identify patterns and improve model performance.
- Visualized analytical results using **Matplotlib and Seaborn** to generate meaningful insights.
- Worked with structured datasets to understand **data patterns, correlations, and trends**.

Projects

Facial Expression Recognition System

Python, Machine Learning

- Built a machine learning model to detect and classify **human facial emotions from images**.
- Applied **image preprocessing and feature extraction techniques** to improve prediction accuracy.
- Used **Python libraries such as OpenCV, NumPy, and Scikit-learn** for model development.
- Evaluated model performance using accuracy and validation metrics.

Exploratory Data Analysis Project

Python, Data Analysis

- Performed **data cleaning and preprocessing** on raw datasets using Python.
- Conducted **EDA to identify trends, patterns, and correlations**.
- Created visualizations using **Matplotlib and Seaborn** to present insights.
- Generated analytical reports to summarize findings.

Certifications

- **Machine Learning with Python – Coursera** – June 2025: Supervised & unsupervised learning, model training, and evaluation using Scikit-learn, NumPy, and Pandas.
- **Python for Data Science – IBM (via Coursera)** – April 2025: Data analysis using Python, Pandas, NumPy, and data visualization using Matplotlib & Seaborn.
- **Data Visualization with Power BI – Microsoft Learn** – August 2025: Built interactive dashboards, data modeling, and business insights using Power BI.

Education

B-Tech Artificial Intelligence & Data Science

Tagore Institute of Engineering And Technology

Graduated: 2026

CGPA: 7.8 / 10

Languages

- **English – Conversational**
- **Tamil – Native**
